Date	Topics/ Skills covered
18 October 2025	Focusing on the skeletal structure and proportion of the head and hands. Through a combination of diagrammatic studies we'll identify key bony landmarks such as the skull's planes, eye sockets, jaw, and the architecture of the hand and wrist. These form the foundation for understanding surface anatomy and are essential for achieving accurate likeness and gesture.
19 October 2025	Building on Saturday's structural work, we turn our attention to the muscles of the face and hands. Using tonal drawing techniques, students will explore how muscle masses contribute to expression, form, and gesture.
