

COURSE TITLE	WATERCOLOUR: EXPLORING THE NATURAL WORLD
COURSE CODE	WC2501PWA1
TUTOR	LAURA RIBBONS
START DATE	15/11/2025
DAY & TIME	SATURDAY & SUNDAY, 10AM - 4.30PM
LEVEL	ALL LEVELS
LOCATION	BANKSIDE CAMPUS

DAILY BREAKDOWN

Date	Topics/ Skills covered
15 November 2025	The morning will begin with colour mixing. We will look at basic colour theory and explore how we can achieve tonal variation in watercolour. We will begin by focusing on how we can most effectively replicate colours seen in nature, we will then work on layering colours together - creating semi-transparent 'glazes' of colour, taking inspiration from the watercolours of Callum Innes to create simple abstract compositions. We will then look at wet-on-wet and how to create a simple skyscapes. In the afternoon we will work from a composition of plants in the studio. We will consider how the process of careful observation can change our relationship to plants and enhance our understanding of other species. On a technical level we will be building on skills developed during the morning session and will work on expanding on an understanding of how to create a simple composition, build up layers of colour and think about how best to use our brush strokes to produce a vibrant finished painting.
16 November 2025	In the morning we will be building on colour theory from Saturday's session, combining this with an understanding of texture. We will use plant matter (herbs, leaves etc) in combination with other alternative painting tools in order to develop a semi-abstract composition exploring colour and texture. This will be a sensory process and will allow for a more experimental approach to watercolour as a medium. In the afternoon we will focus on creating our own landscape composition, incorporating the textural language developed during the morning's session. Students will also be encouraged to include elements of collage. Students can choose to do what we might think of as a more 'traditional' landscape painting, or attempt something more contemporary. This portion of the day offers an opportunity for students to visually explore contrasts between green spaces and human-built environments, and to consider the need and importance of green spaces in cities like London. Students will be shown examples of contemporary artists for inspiration.
